This scholarship program is very challenging, but the opportunity to have in depth experience in a developed country's medical practice will put them on the road to a successful career. It should be noted that as former Student Teachers they already have fluency in English. So, they are on their way to becoming trilingual with competency in three completely different languages with three completely different forms of writing.

UPDATE ON COVID-19 IN CAMBODIA

After 52 days of having no Covid cases in Cambodia, during the single day of June 28th ten cases of the Omicron variant were detected. While more cases have since been reported (averaging 5 a day), the smaller numbers involved, as well as the reduced severity of the cases, likely reflects Cambodia's high vaccination rate which is in the area of 90%.

The vaccination process in Cambodia continues to move forward. As of the 30th June 2022, a total of 15,086,377 individuals received two doses. 9,480,098 received a booster dose, with 2,924,182 receiving a 4th booster, and 300,934 receiving a 5th booster dose.
